American Machinist

A PRACTICAL JOURNAL FOR MACHINE CONSTRUCTION

ISSUED WEEKLY

VOLUME XLVII

July 1 to December 31, 1917

McGRAW-HILL CO., Inc.
10TH AVENUE AT 36TH STREET
NEW YORK

EXPLANATORY NOTE

Illustrated articles are marked with an asterisk (*), book notices with a dagger (†). Cross references to a particular initial word may apply also to its derivatives. The cross references condense the matter and assist the reader, but are not to be regarded as complete or conclusive. So, if there were a reference from "Milling" to "Jigs and fixtures," and if the searcher failed to find the required article under the latter topic, he should look through the "Milling" entries, or others that the subject might suggest, as he would have done had there been no cross reference. The plural of any given item may not necessarily follow the singular immediately, as the items are listed in alphabetical order. All articles written by any given author are listed directly under his name. Articles that are not credited to any author, or are credited to "Special Correspondence," may be found under the heading "No author."

Following is a list of the pages included in the several numbers of the volume, by date:

July	5	Pages	1-43
"	12	"	45-87
"	19	"	89-131
"	26	"	133-175
Aug.	2	"	177-219
"	9	"	221-263
"	16	"	265-307
"	23	"	309-351
"	30	"	353-395
Sept.	6	"	397-439
"	13	"	441-483
"	20	"	485-527
"	27	"	529-571
Oct.	4	"	573-615
"	11	"	617-659
"	18	"	661-703
"	25	"	705-747
Nov.	1	"	749-791
"	8	"	793-835
"	15	"	837-879
"	22	"	881-923
"	29	"	925-967
Dec.	6	"	969-1019
"	13	"	1021-1063
"	20	"	1065-1107
"	27	"	1109-1151

A

Page

About the cost-plus plan 652
Accident prevention in the textile industry. Beyer 1102
Accident. We never have one. Entropy 775
Ackerman, J. W.:
Turning accurate ball joints *100
Adapter, Hollow setscrew used as. Dicley .. 33
Adapter, Spring-chuck. Grant *866
Adding life by taking care of a micrometer. Darling *1095
Addison, Christopher, Rt. Hon.:
British workshops and the war *799
Adjustable boring-tool holder for milling machine. Forray *780
Adjuster, Droplight. Anderson *162
Adjusting collars, Machining. Groocock *297. Terry 977
Advantages and disadvantages of skeleton or built-up core boxes. Duggan *865
Advisory Commission. Congress and 124
Aërodrome at Turin, Italy. Unusual roof construction of *732
Aëronautics. Terms used in *104
Aëroplane. See "Airplane."
Agents for Belgium. How to appoint after the war. Knowlton *140. Woods 256. Carpenter 761. Van Wymeersch 884. Monte 934. Benedictus 1043
Ahlers, Joseph A., Jr.:
Cone-point bearings *603
Air and steam connections for a railroad yard. Long *473
Air blast, Portable electric. Hoag *823
Air chuck, Expanding. Shaff *1078
Air, Compressed. Harris ..... †394
Air, Compressed, for the metal worker. Hirschberg ..... †438
Air-hoist piston packing. Bershee *552
Air hose—Clamping with wire to stay. Hunter *598
Air-operated piston guide. Dick *181
Air service, U. S. Army. Skilled workers wanted in 919
Air-tight hose connections. Economy of. Harris 985

AIRPLANE

—Aërodrome, Pomilio. Unusual roof construction *732
—Aëronautics. Terms used in *104
—Aircraft Standards Board—Specifications for testing and inspecting metallic materials 813
—Airplane situation. Curtiss 1005
—Airplane work. Possibilities of rapid growth in. Colvin *629
—Aviators. Training for British army. Colvin *363
—Building a military training airplane. Colvin *585
—Canadian aviation camp. Colvin .. *221. *409
—Design, Prof. Marks to assist 257
—Eagle's flight. Don't delay *36
—Guns, Machine, on military airplanes. Heinmiller 337. Monte *816
—Langley airplane. Recollections of. Manley 973

AIRPLANE—Continued
—Metal frames and fittings for airplanes. Colvin *1075
—Parts. Proposed S. A. E. standards for .. *317
—Propeller and strut lathe. Defiance. *567. *615
—Selecting mechanics for Royal Flying Corps. Colvin *762
—Seventy-five-mm. anti-aircraft gun *1074
—Specifications for testing and inspecting metallic materials. Government 813
—Spot welding parts. Haas *837
—"Standard" airplane motor 526
—Standard design 130
—Standards, International aircraft 812
—Women in airplane production. Chubb .. *705
—Woods, Kiln drying 871
Akimoff, N. W.:
Recent developments in balancing apparatus *1121
Alcohol, Ethyl, from wood 690
Alexander, Magnus W.:
Cost of health supervision in the metal trades in 1916 1049
Algoma Steel Co. moves blast furnace 205
Alignment chart for milling cutters. Jenkins *94
Allowance for clearance in cored holes. Kahn *682
Ambitious men really wanted? Entropy 14. Koontz 75. Williams 341. Burckes 602. Murphy 647. Osborne 671. Maplethorpe. 877
American Electrochemical Society 108
American Gear Manufacturers' Association. 570
American Laundry Machinery Co., Special fixtures. Hoag *289
"American Machinist"—Appropriate holiday gift 1150
"American Machinist" fortieth birthday .. 1015
"American Machinist." Some personal recollections of. Colvin 1008
"American Machinist"—Why issues are sometimes late 1144
American Society of Mechanical Engineers. See "Engineers."
American Steel Export Co.—Scythes for Russia 294
Ammunition. See also "War," "Shells," etc.
Ammunition, Artillery, U. S. Viall ..... †438
Ammunition boxes, reinforced, Manufacturing hardware for. Merriam *929
Amount of metal a U. S. soldier carries .. 928
Analysis, control and expense, Shop. Ficker. †658
Anderson, C.:
Arbor kink prevents marring the work .. *911
Keeping belt glue in bottle 919
Anderson, O.:
Droplight adjuster *162
Andrews, E.:
Helping the foreman to get results 1018
Andrus, George:
Ball bearings for electric motors 1079
Aneroid calorimeter for specific and latent heat. Osborne ..... †878

Page

Angle iron, Adjustable, Hunt *414
Angle plate, Universal, for toolmakers, Bernhardson *736
Angle plate, Useful, Darling *1013
Angles, Accurate, without a protractor, Spurgin *161, Erratum 372
Angles, Checking with Swedish blocks, Lewis *353
Angles, Layouts vs. computation for obtaining, Koontz *186, Ginsburg 699
Angles, Table of, for dividing circles and laying out polygons, MacGregor 1014
Angles—Uses of the sine bar, Bryant *749
Annealing pots, Casting, Holaday 650
Another opportunity to help Uncle Sam 651
Anti-aircraft gun, 75-mm *1074
Apple, H. L.:
  Accurate setting device for internal grinding *408
Application of efficiency principles, Shepard *614
Apprentice, Drafting-room, Horton *415
Apprentice—Kind of work for a trade school shop, Forbes 1052
Approach of milling cutters, Calculating, Morrison 232
Approach of milling cutters, Chart for determining, Hinkel *910
Appropriate holiday gift 1150
Arbor. See also "Mandrel."
Arbor kink prevents marring work, Anderson *911
Arbor press, Fox *301, *351
Arbors, Gang, should be more widely used, Darling *163
Arc Cutting on lathe, Turner *714, Moody 1084
Arc-forming attachment for lathe and shaper, Christman *431, Taylor 569
Arc welding. See "Welding and cutting."
Architecture, naval and marine engineering, Courses in 871
Are we doing our bit? 958
Armstrong, H. H.:
  Recording die, jig and fixture numbers on drawings 250
Army. See also "War."
Army and navy, British, Supplying skilled artificers for, Asquith 920
Arny, Louis W.:
  Specifications for leather belting 361
Arsenals and manufacturers, Governmental suggestions for 1085
Articles, Technical, Censoring 561
Artillery ammunition, U. S., Viall 1438
Asquith, Capt. Cyril:
  Supplying skilled artificers for the army and navy 920
Assembling, Selective and interchangeability, Guyler 644
Attachment for cutting cams and profiles, Roemer *513
Attachment for floor crane, Westbrook *1093
Attachment for planing a radius, Johnson *822
Attachment for rack-cutting on the shaping machine, Cross *910
Attachment for turning and boring on planing machine *1054
Austin, J. C.:
  Broadmindedness in design 473
Automatic. See also "Screw—Screw machine," "Lathe," etc.
Automatic machinery, Cams for, Hall *158
Automatic ring-gear machine, Fay *557, *791
Automatic rivet- and tack-driving machine, Dosker *1052
Automatic screw machine, Four-spindle, cone *741, *791
Automatics, Device for safeguarding, McCarter *739
Automatics for machining auto. starter parts *17

AUTOMOBILE
—Brake levers, Machining *506
—Ball levers, Forging, at Franklin Co., Solomon *1046
—Chalmers plant, Spot welding at *421
—Connecting-rod boring machine, Hoag *1103
—Cylinder grinding machine, Hoag *1103
—Design of new military truck 664
—Draw tools for side-rails, Baldus *1140
—Driving the shop with an automobile, Edholm *1096
—Frames, Draw tools for, Baldus *1140
—How to run an automobile, Page *282
—Mufflers, Spot and seam welding, Haas *837
—Nash Motors Co., Methods of, Hoag *1109
—Piston-groove sizing, Dunn 1012
—Sideframe plates, Press for bending a number at once, edgewise, Sheppard *381
—Spot welding at the Chalmers plant *421
—Starter parts, Automatics for machining *17
—Truck factory, Pacific coast, Stanley *857

Automotive engineers *317
Aviation. See "Airplane."
Aviators, Training, for British army, Colvin *363

B

Babbitt, Arthur B.:
  Location of cam followers—I *504, II *591
  Perspective sketching from orthographic views *548
Babbitt blocking for holding irregular work on machine table, Vize *912
Babbitt supporting ring for turning work with projections, Mellen *1144
Babbitting fixture, High-pressure, Hunter *396
Babbitting kink, Schell *296
Backwoods, An echo from, Osborne 974
Bagger, E. G.:
  Saving trucking cost in a large plant *119
Bailey, John:
  Conservation vs. efficiency 1139
Baillie, C. H.:
  Dilution of skilled labor, and women in industries 951
Baker, Donald A.:
  Executive as a tool designer vs. the professional tool designer 797
Jig for drilling time-fuse part *792
Key-slot milling fixture for type 80 fuse *381
Machine for slots in fuse bodies *471
Machine-tool failures 13
Making graduation dies *185
Mechanic and the draft 525
Technical vs. practical tool designers 1037
Time-fuse milling fixture *338
Baker, J. E.:
  Simple drilling jig for use on a yoke casting *432
Balancing apparatus, Recent developments in, Akimoff *1121
Balancing machine, Carwen dynamic *39
Balboa canal shops, Instrument repair work in, Stanley *23, Boiler shops *53, Foundry *191, Railroad work *233, Forge shops *405
Baldus, P.:
  Draw tools for automobile side-rails *1140
Baldwin Locomotive Works—War locomotives in France 856
Ball-bearing centers, Moller *1146
Ball bearings for electric motors, Andrus *1079
Ball bearings—Selective assembling and interchangeability, Guyler 644
Ball cranks, Quick-action, Cincinnati *1146
Ball, Frank A.:
  Wire bending die *1094
Ball joints, Turning accurate, Ackerman *100
Ball levers, Forging, Solomon *1046
Ball, Martin H.:
  Truing light rings *1062
Balls, hollow brass, Drawing, Ginsburg ..... 516, Steel 911
Band, Chuck for holding shell while turning, Burchell *955
Band-saw and re-saw, Oliver *477, *527
Band-saw, metal, Armstrong-Blum *261, *307
Band-saws, Care and upkeep of *457
Banks, William O.:
  Recessing tool *372
Bar, Sine, Binge *868
Barber, S. E.:
  Metal-slitting attachment *718
Barlow, R. S.:
  Economy in hacksaw blades 647
Barrel, Rifle, Special automatic machine, Ingram *905
Barrels, rifle, Forging, Colvin *97
Barrels, Springfield musket, Grinding 60 years ago, Parker *251
Barrett, A. L.:
  Preventing grease-cup trouble 900
Bars, type, for a typewriter, Manufacture of, Stanley *757
Bass, M.:
  Improved drawing-board cover 768
Batteries, Storage, simplified, Page *218
Bearing caps, large, Pattern for, Dill *1050
Bearing, Roller thrust on drilling spindle, Hawley *866
Bearings, Ball, for electric motors, Andrus *1079
Bearings, Cone-point, Ahlers *603
Bearings, Critical speeds of rotors resting on two, Rautenstrauch *1053
Bearings—How dull tools displace the grain of bearing metals, Bierbaum *665
Bearings—Selective assembling and interchangeability, Guyler 644
Bearings, Two ways of babbitting, Chamberlain *691
Becker, E. D.:
  Special V-block for grinding work *1024
Becknell, G. G.:
  Tests of cork for friction clutches and other purposes 972
Becoming a planer specialist—A letter from Jack to Bill *450
Belgium, Machine tools in, Todd 1045
Belt glue, Keeping in bottle, Anderson 919
Belt, pulling power of, Influence of centrifugal force on, Van Arkel 515
Belt shifter, Repairing, Lauterlach *640
Belting—Countershaft drive problem, Limbrunner *120, Butterfield *471, Maplethorpe 891
Belting in coils, Length of, Gwinner 1038
Belting, leather, Specifications for, Arny 361
Bench crane, Lucas *534, *979
Bench rig used as drill press, press, vise, etc., Lucas *535
Benches for a small shop, Long *429
Bender for ship frames, Watson-Stillman *84
Bending tubing—Finding developed length 476
Benedictus, Henri:
  Appointing agents for Belgium 1043
Bennett, W. Burr:
  Spoked handwheels for machine tools *63
Bentley, Joseph H.:
  Shave-milling the bolt for army rifle *900
Bernhardson, R.:
  Universal angle plate for the use of toolmakers *736
Bershee, George W.:
  Air-hoist piston packing *552
Bethlehem Steel Co., Big gun work at *210
Bevel protractor kink, Mapes 343
Beyer, David S.:
  Accident prevention in the textile industry 1102
Bierbaum, Christopher H.:
  How dull tools displace the grain of bearing metals *665
Big jobbing shop and foundry in Texas, Stanley *1133
Big saving in freight cars by increase in loads 1026
Bill, Steel, Slicing 652
Billings, J. Harland:
  Errors in measuring thread pitch diameters with wires *1077
Bin, stock, Hobart Bros. *479, *571
Binge, Burt:
  Sine bar for toolmakers *898
Birthday, Our fortieth 1015
Bit, Are we doing our? 958
Bits, high-speed steel, Forging, Johnson 648
Blacklist, Draftsmen's, Horton *497
Blacksmith shop, Railroad, Stanley *715
Blades, hacksaw, Economy in, Barlow 647
Blakeman, Winfield W.:
  Sensitive tap and die holder *257
Blast, Portable electric air, Hoag *823
Blades, shear, Clamp for, Lucas *713
Blanking. See "Press."
Blanks, large shell, Handling, Hoag *481
Blast furnace, Moving 205
Block, V-, for grinding work, Becker *1024
Blocking, Babbitt, for holding work on machine table, Vize *912
Blocks, Swedish, Checking angles with, Lewis *353
Blood, C. C.:
  Taper-boring attachment for turret lathe *122
Blower, Portable electric, Hoag *823
Blower—Thin loose collar parts on a shaft, Davis 708
Blueprint and drawing holder, National Co.'s "Presto" *1059, *1151
Blueprint machine, Wetzel *867
Blueprints, Folding rack for, Jones *892
Blueprints from penciled tracings, Mills 293
Board, Job-tracing, Swann *613
Boards, Safety bulletin, Morgan *467
Boggs, Bruce A.:
  Correspondence-school draftsmen 941
Boiler shops, Panama canal, at Balboa, Stanley *53
Boiler work in a Nevada railroad shop, Stanley *641
Boilers, Steam, Kuss 1306
Bolkovac, Josef:
  Manufacturing thread gages 938
Bolt for army rifle, Shave-milling, Bentley *900
Bolt slot in military rifles, Splining, Whitney *382
Bolts, countersunk head, Holder for, Chapman *515
Bolts, Drill sizes for, Colvin *629
Bolts, foundation, Method of installing, Lailer *32
Bolts stuck in socket wrench in bolt-cutter, Chapman 33
Bonus, Giving, to foreman, Lord *752
Book, Helmer T.:
  Knife-edge sine bar *733
Booking type of core box, Application and use of, Hunter 455
Borden, B.:
  Forged and welded copper flowers *293
  Preventing cracks in hardening 645

BORING
—Bar, Proportioning, for maximum stiffness, Strombeck *420
—Boring and drilling machine, Horizontal, Rockford *610, *703
—Boring and drilling machine, Pawling & Harnischfeger *655, *747
—Boring mill table, Centering work on, with graduated wedges, McCray *241
—Chuck, Production, for boring mill, Millinger *957
—Connecting-rod boring machines, Hoag *1103
—Cutters, double-end, Universal mandrel for, McCray *142
—Cylinder boring machine, Moline *520, *571
—Drilling and boring machine, Pawling & Harnischfeger *655, *747
—Cisholt boring mills, Time studies for rate setting on—I, Merrick *5
—Head, facing, Combination roughing and finishing, McCray *62
—Rifle-barrel machine, Special automatic, Ingram *905
—Shells, 6-in., Form boring nose of, Strombeck *121
—Taper-boring attachment for lathe, Blood *122
—Tool, boring, also counterbore, end mill and hollow mill, Hall *302, *395
—Tool holder, Adjustable, for milling machine, Forray *780
—Tools, boring and facing, Kelly *169, *263
—Tools, inserted cutter, Lovejoy *785, *879
—Turning and boring attachment for planing machine *1054

Bosses, men and diplomacy, Entropy 825
Bossman, M. W.:
  Economical counterbore *1086
Bottle, Keeping belt glue in, Anderson 919
Bowl, combination sugar, Manufacturing operations on *418
Box, Handy tote, Stevens *305
Boxes, Gang core, lessen foundry costs, Hunter *333
Boxes, reinforced ammunition, Manufacturing hardware for, Merriam *929
Boylan, J. B.:
  Milling vise for use between centers *475
Bracket, tool-feed, Machining, Brophy *932
Brads, Tool for driving, Mason *1014
Brain and muscle, Thomas 1081
Brake and clutch for textile machine, Meyer *692
Brake for wire roller, Kuhne *1051
Brake levers, automobile emergency, Machining *506
Brake, prony, Portable, Larson *479
Brand, Charles L.:
  Annealing hard spots in oxyacetylene repairs 500
Brass, Niter cake for pickling 932
Brass-shell drawing and redrawing, Kuhne *818
Brazing and welding stellite to carbon steel, Fish 636
Breaking up car wheels, Winslow 776
Breaking up a spy plot and other things—From Jack to Bill *714
Breakage of roughing lathe tools, Yost 1049
Bridgeport, Moving, to France 606
Briggs, G. E.:
  Trade with South America 906
British. See also "Great Britain," "England," etc.
British factories, First-aid boxes for 404
British metal imports 385
British "tank" and the man who suggested it *1010
British workshops and the war, Addison *799
Broach for expanding bushings, Hallett *93

7 318

620.5

Broaches, Designing and using. Groocock. 809
Broaching machine, Largest, ever built....*649
Broaching machine made from old lathe, Repony *232
Broaching machine, Quick-acting chuck on, Olsen *260
Broaching machine, Punching on, Shulver. *955
Broaching on a planer, McCarter..... *32
Brooklyn Polytechnic Institute—Courses in naval architecture and marine engineering 871
Brophy, J. P.:
Four attributes of success—or failure.. 677
Machining a tool-feed bracket..... *932
Special continuous painting machine....*811
Why force us to speak a foreign language? *530
Brown & Sharpe—Inspection of gearing, Waterman 939
Brush, Cleaning, made from wire rope, Willey *80
Bryant, E. J.:
Uses of the sine bar..... *749
Buffer and ejector, Adjustable, for press work, Menkin *122
Buffet, E. P.:
Henry Le Chatelier on some unsolved problems in heat-treatment..... 332
Buffing and grinding stand, electric, United States *346, *393
Builders, machine-tool, Responsibility of, Japp *846
Building a military training airplane, Colvin *585
Building a payroll machine, Hoag..... *573
Building a precision lathe, Hoag..... *464
Bulge, Producing, in tubing, Quimby.... *860
Bulletin boards, Safety, Morgan..... *467
Burchell, E. W.:
Holding the shell while turning the band. *955
Chuck for 1-lb. shells..... *778
Burckes, Roy C.:
Are ambitious young men really wanted? 602
Bureau of Mines—Regulations for handling explosives 931
Bureau of Standards and the machine building industry, Stratton..... 976
Bureau of Standards—Standardizing symbols for screw-thread notation and formulas 326
Burrell, A. E.:
Estimating gear-shaper production..... 475
Burring and filing machine, Eyre..... *181
Burrs, Tool for removing, from jam nuts, Culver *1137
Bushing a loose pulley, Hecker *414, Peskett 1000
Bushing plate, Auxiliary, in toolwork, Pusep *340
Bushings, Expanding, Hallett..... *93
Bushings, thin, Keys through, McCray *121, Eisler *824
Business, See also "Trade."
Business finance, Lough..... †306
Business men of United States call great patriotic war convention..... 383
Business requirements on contract work, Vernon 462
Butler, Leon M.:
Mounting, balancing and dressing grinding wheels 250
Butterfield, Andrew M.:
Countershaft-drive problem *171
Button-setting job, Harris 602, Pusep....1052
Buttons, Using jig plate to locate, Selby. *986
Buying, Quantity, and prices..... 253

C

C. & C. Co.—Equipment repairs in a gold and silver mine..... *687
Caissons, carriages and limbers for 75-mm. guns—I, Hoag *793, II *861, III..... *901
Calcaterra, Joseph:
Card-indexing articles 964
Positively located drill jig..... *284
Calculating for electromagnets, Thomas.. 1096
Calculating machine, Manufacturing, in a Western shop, Stanley..... *995
Calculator, Metal and wire and sheet gage tables, Stobbs ..... †218
Calculator, Time and wage, Cooley..... *819
Calibrating and straightening machine for gun barrels, Sponsel..... *744, *835
California, Making oil-well tools in..... *892
Caliper, See also "Gage."
Caliper, Direct-reading, Todt..... *170, *219
Caliper, Improved hermaphrodite, Wood. *217
Call and fire-alarm systems, Standard *875, 967
Calorimeter, Ameroid, for specific and latent heats, Osborne..... †878
Cam, Cutting, on a lathe, Wilson..... *912
Cam followers, Location of—I, Babbitt *504, II 591
Cam layout for loom harnesses, Merrill.. *336
Cam—Modified Geneva two-stage stop motion, Constable *823
Camps, army, Vast amount of construction material required for..... 236
Cams and profiles, Attachment for cutting, Roemer *513
Cams for small automatic machinery, Hall. *158
Camshaft facing fixture, Mason..... *691
Canadian aviation camp, Colvin....*221, *409
Cannon making in past centuries, Manchester *617
Canteens and other similar work, Producing, Steel 911
Canvas, Yosemite garage under..... *359
Caps, large bearing, Patterns for, Dill...*1050
Car wheels, Breaking up, Winslow..... 776
Card-indexing articles, Calcaterra..... 964
Care and upkeep of band-saws..... *457
Care and treatment of saws, Durham ...†966
Care in giving orders..... 1104
Carl, H. C.:
English lead screw and metric threads..1048
Card holder, Universal..... *41
Carlisle, Penn., Chamber of Commerce.... 158
Carpenter, C. E.:
Selling American machine tools in Europe 761
Carriages, caissons and limbers for 75-mm. guns—I, Hoag *793, II *861, III..... *901
Carter, O. D.:
Does a grinding wheel peen?..... 31
Cartridge-punch templet, Whittle *322, Starr 686
Caseharden. See "Heat treatment."
Casting, See also "Foundry," "Pattern," etc.
Casting, How would you make this? Duggan *164, *956
Castings, Steel, for ordnance construction, Wesson 679
Catchings, Waddill:
Obtaining transportation priorities..... 562
Censoring technical articles..... 561
Center for fluting small reamers, Pusep..*843
Center holes, eccentric, Locating, Craft.. 860
Center holes, untrue, Correcting, Stauffer.*981
Center punch, Ring-marking, Charlton....*957
Center, Transfer, and drill plate, Ontario.. *93
Centering device, Lucas..... *256
Centering device for drilling V-blocks, Simmons *623
Centering work with graduated wedges, McCray *341
Centers, Ball-bearing, Moller..... *1146
Centers, cutters and chucks, Removing, Macheck 581
Centers, miller, dividing head and tail, Truing, Slider 322, Conradson..... *957
Centers, milling machine, Truing, Lang.. 954
Centers, Milling vise for use between, Boylan *475
Centrifugal force, Influence on pulling power of a belt, Van Arkel..... 515
Chalmers Motor Co., Spot welding at.... *421
Chamber of Commerce of U. S. calls war convention 383
Chamber of Commerce, U. S., War convention of 563
Chamberlain, A. J.:
Warring on wasted materials and supplies *691
Chambose, W. E.:
Gage-grinding machine *516
Changing part lists, Weddell..... 909
Chapman, Edwin:
Bolts stuck in socket wrench in bolt-cutter 23
Holder for countersunk head bolts..... *515
Charlton, T. R.:
Ring-marking center punch..... *957
Chart, Alignment, for milling cutters, Jenkins *94
Chart for bending allowance for sheet metal, Colvin *629
Chart for determining approach of milling cutters, Hinkel *910
